## MBE

polibak

One side wide seal range heat sealable, other side treated, metallized extrusion lamination BOPP film.
Properties

- One side aluminium coated by vacuum metalization with excellent adhesion
- Excellent oxygen barrier
- Excellent moisture barrier
- Brillant metal appearance

## Applications

- Designed for high barrier performance packaging applications and extrusion lamination.
- Also suitable for adhesive lamination
PROPERTIES TEST CONDITIONS UNITS TYPICAL VALUES

*B: Back side
*All COF values are dynamic results
*M : Metal
The climatic and storage conditions may influence the metallised surface treatment.
In-line corona treatment is recommended for lamination. An adequate primer on the metallized surface is suggested for printing.
The above information is the result of laboratory test which are applied on samples from standart production. Since the varying conditions under which our products used are beyond our control, all of the above results are without guarantee and warranty.
